Why Jeremy

- Former Navy helicopter pilot with more than 4,500 flight hours and a bias for calm decisions under pressure.
- Helped scale Velocity Restorations into an Inc. 5000 fastest-growing company and through a recent exit.
- Co-founded Climb Capital and helped build a real estate investment and property management platform with more than \$80M in AUM.
- Operator strengths: EOS, financial systems, process improvement, KPIs, leadership rhythm, and disciplined execution.

How to refer

- A high-level note is enough to start: location, industry, revenue or SDE range, team size, seller goal, and timing.
- Jeremy will review personally, protect the advisor relationship, and give fast fit or not-fit feedback.
- If there is alignment, diligence should be careful, confidential, and respectful of the business and owner.
